In the year of 1999 a very important nomenclatural and taxonomical catalogue has been published by the Natural History Museum London: "Geometrid Moths of the World". Approximately 35 000 species group names listed in this catalogue with their original references. We compared the taxonomical information given in this catalogue with the basic information of our Centre. As a result of this, numerous geographical, taxonomical and nomenclatural errors has been recorded. In the first part of this survey, totally 224 serious errors have been corrected. They have been briefly explained in the following table and grouped as follows;

- A - nomenclatural case
- B - nomenclatural error, imperfectness or misspelling
- C - geographical error or imperfectness
- D - geographical error or imperfectness and misspelling
- E - taxonomical error
- F - taxonomical and geographical error

Each case has been indicated below, in the remarks column of the table. In this paper, the following 15 replacement names are proposed: *Abaciscus tsinlingensis* ssp. *cesa*, *Alcis variegata* ssp. *cesa*, *Dysstroma cinereata* ssp. *cesa*, *Eupithecia cesa*, *Eupithecia nepalica*, *Eupithecia costarica*, *Eupithecia himalaya*, *Eupithecia babur*, *Eupithecia shungqar*, *Eupithecia iranica*, *Eupithecia venezuela*, *Eupithecia dohertyi* ssp. *fletcher*, *Eupithecia vojnitzi*, *Eupithecia herbulot*, *Eupithecia alliaria* ssp. *jehannedarc*.
